

Loosen the bolts/screws holding your windshield in the fairing.

Look close and you can see where the center bolt goes through the windshield. This is where the notch in your dash bag fits.

Slide your bag between the windshield and dash. Be sure the notch in the bag back is positioned around the bolt hole.

Make sure your windshield is still seated correctly.

Secure all your bolts.

You're ready to go.

*\*This bag does not work without fairing.*
