Travel Bag Installation Instructions

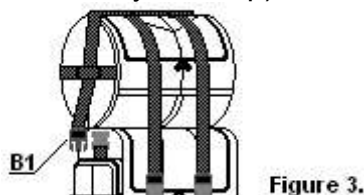

1. Take the 3 straps and select the two shorter ones to work with first. Take the small cylindrical roll bag and place it zipper side up. Thread the straps through the two slots on the top of the bag.

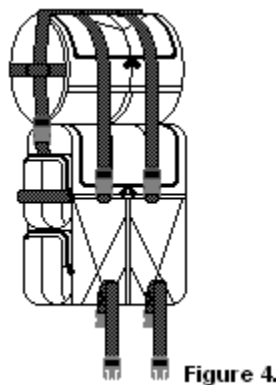

2. On the large pack, unhook the straps where it makes it look like a backpack, freeing the clasps. Take the roll bag with straps and hook to these clips and the top clip on the reverse side of the bag.

3. Take the long strap and align it so it goes from left to right across the roll bag. Thread down through the side slots on the roll bag (middle of the black nylon strap).

4. Along the sides of the large bag above the side pockets are clasps. Hook the long strap to these and adjust for security. You should be set to go.

5. Take the 2 hanging straps, wrap them around the sissy bar and secure the clasps.
